Round: <input type="checkbox"/>	Split: <input type="checkbox"/> Log: <input type="checkbox"/>

Wood is Wet/Frozen

Frozen wood is considered wet unless wood was cut and moisture content measured with a moisture content of 20% before freezing.

Buyer's Name: _____

I understand that the wood I have purchased has either a measured moisture content or is considered wet. I also understand that wood with a moisture content less than 20% is considered 'dry' and burns cleaner. In the Fairbanks nonattainment area, I understand that starting October 2015, only dry wood may be burned between October 1 - March 31.

Buyer's Signature: _____

Buyer unavailable Buyer declines to sign

Date Wood Cut: _____
(MM/YY)

Measured Moisture Content*

*Meter measured moisture content is subject to variability, a more rigorous laboratory analysis may have a different result. **Measurement not required if wood is wet/frozen.**
