AKGRS - <http://www.akgrs.net/>

Tim Robertson reviewed the status of the project. The plans will be reviewed and edited by the tactics group and then placed on the web for review by the entire workgroup for at least one month. If there are no additions to review the plans will be accepted and approved without an additional workgroup meeting. If the co-chairs deem it necessary, they will call a meeting of the workgroup.

The GRS plans were reviewed and edited by the workgroup. After review of aerial photos the addition of Amakdedori Creek- SWCI-18 was accepted and designed.

All members present approved the plans as edited.

Southeast Cook Inlet GRS was discussed. Funding is available; Tesoro-John Kwietniak, and DEC-Dale Gardner will be co-chairs. The initial workgroup meeting will be held in Homer in mid February to establish sites and a tactics meeting in mid April. It was preferred by the group that aerial photos be taken prior to tactics meeting and site surveys to assist with the initial designs. The Don Combs will work with Tim Robertson to accomplish this activity.
